LIGHTNING RFID PORTAL

Positek RFID created the Lightning Portal in response to the demand for a smaller, less expensive RFID portal. It includes the same fast and accurate automatic RFID reading components as our larger Cyclone Portal and Tornado Portal.

Automated reading eliminates read rates that can be affected by employee technique. RFID reading with the Lightning Portal is started with the press of a button and can only begin when the door is closed. A Red indicator light illuminates during reading. When reading is complete, the light turns Green and the door can be opened. Positek RFID's software communicates with third party software packages as well as with the Positek RFID Software suite.

The Lightning Portal can be used for both soiled and clean textiles as well as assignment of RFID to new textiles.

Exterior Dimensions

Doors Open 90°: 66.7"W x 83.11"H x 94.38"D

Interior Dimensions

49"W x 78"H x 59"D

Complete RFID Systems, Solutions and Integration for the Textile Maintenance Industry

Positek RFID creates and installs custom-designed Laundry management solutions that enable companies to cut labor costs, reduce merchandise costs, eliminate shortages, accurately track, sort and inventory goods, and improve productivity, thereby increasing profitability
