## CONSISTENT AND ACCURATE RFID READING

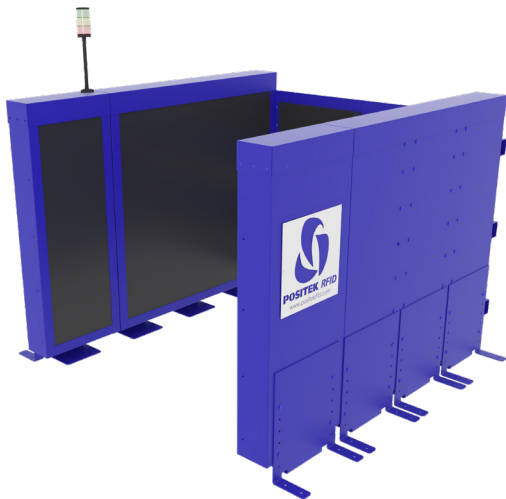

- Quickly identifies soil items without manual counting
- Easily integrates into sling operations with no additional labor required
- Compatible with existing scales and sling lift equipment
- High accuracy counting and item identification
- Available in single and dual models

# UPDRAFT SLING BAG READER

Positek RFID'S Updraft RFID Sling Bag Reader is designed to fit over existing floor scales and can be installed at ground level or recessed into the floor. Automated reading eliminates read rates that can be affected by employee technique.

The unique design limits reading outside of the portal and concentrates the signal where it is needed most. Two designs are available – a 3-Sided model and a two-sided Pass-Through model. Positek RFID's software communicates with third party software packages as well as with the Positek RFID Software suite.

The Updraft RFID Sling Bag Reader can be used for both soiled and clean textiles.

## Exterior Dimensions
