

# POSITEK RFID CLOUD SERVICE FOR HOSPITALITY

Take control of your textile flow, improve loss ratios, and experience a fast ROI with POSITEK RFID CLOUD SERVICE

# STOP GUESSING, START TRACKING

POSITEK RFID takes textile management to the next level

Hotels are all face the same obstacles. They experience inventory challenges, and they often encounter excessive textile loss in areas such as linen, and uniforms.

All too often management and supervisors can only guess because they lack sufficient insight, and quality evidence of the textile movement. Staff members often get frustrated if there are no clean linen, or no linen in the right amounts. This leads to other issues and a disruption in the overall workflow.

## Introducing the solution: POSITEK RFID CLOUD SERVICE

Management of large quantity stocks of linen has become easier, cheaper, less space consuming, and more transparent – with the introduction of POSITEK RFID CLOUD SERVICE.

With POSITEK RFID CLOUD SERVICE, a tiny RFID tag in every piece of clothing or linen provides complete control of tracking the laundry-to-facility cycle. You can overview, manage, and adjust the textile flow online, while also giving you the ability to track your textiles and the usage.

One or more of your products have low inventory.

### Replenish

Alerts on SMS or e-mail on what must be replenish.

# A FLOW OF VALUABLE INSIGHT

The POSITEK RFID CLOUD SERVICE provides full transparency

POSITEK RFID CLOUD SERVICE offers complete transparency, and management of textile depots. The consumption flow is easy to follow thanks to reliable RFID scanning and allows survivability of every piece of textile. The user-friendly management tool delivers crystal clear usage reports for textile improvement and for usage optimization.

**ADVANTAGES FOR EVERYONE INVOLVED**

For administrators and supervisors, POSITEK RFID CLOUD SERVICE dashboard provides a comprehensive overview of the solution and a complete illustration of garment flow, hygiene index, circulation days etc.

For users, the solution makes it easy and considerably less time consuming to pick up clean garments, and to return used ones. They are inspired to change more often, which improves the overall hygiene.

**THE 3 KEY AREAS: DEPOT / SOIL RETURN / SOFTWARE**

Once you have a complete overview of the flow of textiles, you can start achieving results:

*Ease of access → Sufficient textile circulation → Replenishment → Loss prevention*
