ERROR FREE SCANNING AND INCREASED PRODUCTIVITY

- Easy and Quick Installation
- Pole or floor mounting options
- Train any employee in minutes
- Sized to fit between sorting rails
- Fully integrated with Positek RFID software suite or third-party software

WAVE STATION

Positek RFID created the Wave Station to replace manual sorting at double the speed with no mistakes.

Our next-generation Wave Station is available in two distinct models: Single Read UHF or Dual Read (UHF/HF), allowing for maximum flexibility. Voice prompts and on-screen notifications guide operators to place the article on the appropriate hook as each item is scanned. Simplified installation provides the ability to integrate the Wave Station without major retrofitting or interruption.

The Wave Station can be used seamlessly with Positek RFID's software suite or can easily be integrated with third-party software.

Specifications

Total Dimensions: 15"W x 44.1"H x 16"D

Total weight: 41.9 lbs
