*RFID reading in a pass-through design*

The **Hurricane Portal** is a cutting-edge RFID solution built to address the challenges facing industrial laundries. Commercial laundries operate in fast-paced environments where precision and efficiency are critical. The Hurricane Portal offers a powerful solution to these challenges by automating the process of tracking linen and textile assets, delivering real-time visibility, and reducing manual labor.

## FAST RFID READING IN A PASS-THROUGH DESIGN

The Hurricane Portal provides real-time visibility into textile inventory at every stage of the laundry process. By automating inventory tracking, Positek RFID's system reduces labor costs and improves overall accuracy, minimizing the risk of lost textiles. The Hurricane

Portal seamlessly integrates with existing laundry management software, ensuring it can be implemented with minimal disruption to current operations. Additionally, the Hurricane Portal's scalable design allows it to adapt to both small and large facilities.

The Hurricane RFID Portal can be used for both soiled and clean textiles, as well as assignment of RFID to new textiles

The Hurricane Portal automates the process of textile counting by using advanced RFID technology to read large volumes of tagged items with unmatched speed and accuracy. With every tagged textile being automatically tracked, laundry operators can instantly see what's on hand, what's been processed, and what's missing—helping them avoid shortages and delays.

As laundry operations expand, the Hurricane Portal grows with them. Its modular design allows for easy scalability, whether you are managing a small laundry or a large industrial facility. By seamlessly integrating with existing laundry management systems, it optimizes workflows, reducing bottlenecks and speeding up processing times.

## Exterior Dimensions

Doors Open 90°: 66.79"W x 83.11"H x 121.77"D

## Interior Dimensions

Total Dimensions: 49.5"W x 79.31"H x 63.12"D
