

Data Sheet

Updraft Sling Bag Reader

Precision tracking

The **Updraft Sling Bag Reader** is a specialized RFID solution designed to deliver fast hands-free tracking of sling bags in high-demand industrial environments. Built with robust UHF RFID technology, the Updraft reader captures data from hundreds of tagged items in sling bags with exceptional accuracy, allowing facilities to streamline their processes and eliminate the manual handling required for individual scans.

STREAMLINE EVERY LOAD WITH RELIABLE RFID

For industrial laundry companies, the Updraft Sling Bag Reader is a game-changer, providing significant operational efficiencies and helping streamline the entire inventory process. Its high-accuracy RFID reads prevent costly errors, ensuring no item

is misplaced. This enhanced visibility empowers laundry facilities to manage inventory more effectively, avoid stock shortages, and improve service delivery to customers. With real-time tracking, laundry companies can boost productivity and profitability.

The Updraft Sling Bag Reader is designed to fit over existing floor scales and can be installed at ground level or recessed into the floor.

For configurability, the **Updraft Sling Bag Reader** comes in two designs – a three-sided model or a two-sided pass-through model. Positek RFID's software integrates seamlessly with third-party software packages as well as with the Positek RFID Software suite. The Updraft Sling Bag Reader can be used for both soiled and clean textiles.

Exterior Dimensions

Total dimensions: 73.46"W x 55.19"H x 67.36"D

Interior Dimensions

Total dimensions: 73.46"W x 55.19"H x 67.36"D
